## D. Conclusions and final remarks

*Please provide constructive conclusions and final remarks, which may form the basis upon which improvements of the quality of each programme of study under review may be achieved, with emphasis on the correspondence with the EQF.*

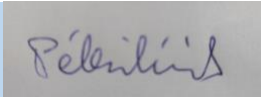

The programme has been designed and is maintained by an appropriately qualified, committed academic staff which integrates musicians and scholars and which receives a supporting administrative and academic environment from the university. Regulations, procedures and agendas of quality assurance are well articulated, transparent and accessible for stakeholders. Teaching and learning processes are facilitated by a high-level infrastructure, by innovative methodologies and by a sophisticated student support system. The learning outcomes are well defined, and the certificate expresses them adequately in line with the regulations of the European Higher Education Area. A variety of pedagogical methods is employed with corresponding methods of assessment. Satisfactory connections exist between faculty, students, alumni and external institutions.

There is room for improvement especially with reference to the workload and research output of the faculty. The assessors suggest to mitigate the excessive amount of administrative work currently handled efficiently by supporting the faculty with additional administrative staff.

The assessors found certain weaknesses in the provision of online databases regarding music, especially RILM and RISM and, also, suggest to enlarge Erasmus mobility.
